

Library System

The main functionalities of the library system includes – borrowing and returning books in a library; getting the list of books by a particular author or in a particular subject area, finding out the list of books currently checked out by a particular borrower, and finding out what borrower last checked out a particular copy of a book.

Identify the actors and create user stories based on the given description and any assumptions you may make for the system.

Complain Register

The complain register system allows students of a university to register and track complains related to plumbing, electric, and carpentary.

Identify the actors and create user stories based on the given description and any assumptions you may make for the system.
